### Executive Summary

---

The present document accompanies Deliverable 3.6, the work on the enrichment of the Big Data players' map of SMEs and startups on top of the Data Landscape portal, within the BDVe project Work Package 3 "ECOSYSTEM. Community building and engagement".

The Data Landscape portal is part of the European Data Market study for the Directorate-General for Communications Networks, Content and Technology and is managed by IDC and Open Evidence.

# 1 Introduction

The present document accompanies Deliverable 3.6, the work on the enrichment of the Big Data players map of SMEs and startups on top of the Data Landscape portal<sup>1</sup>, within the BDVe project Work Package 3 “ECOSYSTEM. Community building and engagement”.

The Data Landscape portal is part of the European Data Market study for the Directorate-General for Communications Networks, Content and Technology and is managed by IDC and Open Evidence<sup>2</sup>.

During the first period (January-June 2017), the work was focused on the negotiation about the collaboration between the two projects – Data Landscape portal and BDVe project. As a result, it was agreed that Data Landscape portal managers update the database with the data provided by the BDVe project – the list of “new”<sup>3</sup> players in Big Data in Europe: SMEs and startups – and thus enrich the map of Big Data players in Europe.

<sup>1</sup> [www.datalandscape.eu](http://www.datalandscape.eu)

<sup>2</sup> [www.open-evidence.com](http://www.open-evidence.com)

<sup>3</sup> “New” means the organisation has not been mapped on Data Landscape yet.

## 2 Enriched Map of Big Data Players in Europe: SMEs and startups

### 2.1 Enriched map of European SMEs and startups

#### 2.1.1 Data Landscape portal

The Data Landscape portal is part of the European Data Market study for the Directorate-General for Communications Networks, Content and Technology and is managed by IDC and Open Evidence.

The European Data Market study aims to define, assess, and measure the European data economy, supporting the achievement of the Data Value Chain policy of the European Commission. This strategy is focused on developing a vibrant and innovative data ecosystem of stakeholders driving the growth of this innovative market in Europe. The main results of the study feed into the annual reviews of the Digital Agenda Scoreboard providing valuable data and information.

In addition, the study also plans to support the development of the community of relevant stakeholders in the EU. Since the “data community” in Europe is already strong albeit very diverse, dispersed in several communities, the study wants to move from disparate communities to a genuine stakeholders’ ecosystem.

#### 2.1.2 Enrichment data

For the first round of the enrichment task, we reused the data about the companies participating in the Open Data Incubator Europe (ODINE)<sup>4</sup>. The following companies in Table 1 were added to the Data Landscape portal:

Company name	Country	Title w
1848	Netherlands	<a href="http://1848.nl">http://1848.nl</a>
Air and Space Evidence	United Kingdom	<a href="http://www.space-evidence.net">http://www.space-evidence.net</a>
ASK HELMUT	Germany	<a href="http://askhelmut.com/berlin">http://askhelmut.com/berlin</a>
Avuxi	United Kingdom	<a href="http://www.avuxi.com">www.avuxi.com</a>
Bike Citizens	Austria	<a href="http://www.bikecitizens.net">http://www.bikecitizens.net</a>

**Table 1: Companies added to the Data Landscape portal**

## D3.6 Enriched map of Big Data players in Europe: SMEs and startups

### 2.1.3 Recommendations

It was also agreed with the Data Landscape portal managers, the BDVe project would provide its feedback to improve the portal and the monitor service, if any. By now, there are two recommendations:

- Tags: add a tag “SME” or “startup” to make it possible to filter.
- Search: “whole words only” search is available, i.e. it is not possible to search with an incomplete word, e.g. “til” does not return “Tilde”, which is in the data.

### 3 Conclusions

The list of 50 companies participating in ODINE was prepared and provided to the Data Landscape portal managers for upload.

The portal is a living resource and the list of Big Data players: SMEs and startups will be updated on a continuous basis within the BDVe project in collaboration with IDC and Open Evidence. The next update is expected in December 2017.

In addition, further recommendations on possible improvement of the Data Landscape portal will be provided, if any.
